## FLAMES ANNUAL MEETING 2014 Scientific Integrity Consciously (Un)Making Mistakes Friday April 25th 2014 Martelaarsplein 7, 1000 Brussels

### CALL FOR SHORT ABSTRACT OR TOPIC

#### Afternoon Workshops on Methodological and Statistical Issues

Because the proper use of methodology and statistics is a key element of scientific integrity, **workshops** will focus on **potential problems** that researchers face while applying methodological and statistical tools. Young researchers will be able to **share problems** they have encountered during their own research and **discuss possible solutions guided by experts** in order to foster best practices that are key to ensuring scientific integrity.

We invite **researchers from all disciplines** to **submit a short abstract or topic** on methodological or statistical challenges they have encountered in their research in order to draw from real-life settings.

#### Topic examples:

- (How) should I take the expectations of interviewees into consideration?
- How can I appropriately handle violations of assumptions?

**Program:** please turn over

#### Registration and abstract submission:

[www.flames-statistics.eu/events/call-abstracts-fam-2014-workshops-open](http://www.flames-statistics.eu/events/call-abstracts-fam-2014-workshops-open)

**Abstract submission deadline:** April 15, 2014
